3.5" deep FR Series Frameless models (4.25" overall depth)

These models have a door which is $\frac{3}{4}$ " larger all the way around than the cabinet box itself so the entire cabinet box and trim surround is covered when the door is closed.

These models must be screwed to the studs on both sides of the wall opening.

Frameless recessed cabinets have a thin plastic trim surround which covers the rough edge of the drywall when inserted into the opening.
